Description:

A Meidiland series rose, absolutely smothered in double light pink flowers in early summer, repeat-blooming; compact, mounded habit, quite hardy and resistant to disease, a valuable garden shrub

Ornamental Features

Bonica Rose is draped in stunning lightly-scented shell pink flowers at the ends of the branches from late spring to late summer. The flowers are excellent for cutting. It has dark green foliage throughout the season. The oval compound leaves turn yellow in fall. The fruits are showy orange hips displayed from mid to late fall. The spiny brick red bark adds an interesting dimension to the landscape.

Landscape Attributes

Bonica Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Bonica Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Bonica Rose will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.
