Prairie Petite Lilac

Syringa vulgaris 'Prairie Petite'

Height: 3 feet

Spread: 3 feet

Sunlight: ☉

Hardiness Zone: 2

Other Names: Common Lilac

Group/Class: Miniature Lilac

Description:

An interesting spring blooming miniature lilac featuring sweetly fragrant pink flowers in upright panicles; upright, multi-stemmed habit, very hardy, ideal for small areas; full sun and well-drained soil, allow room for air movement

Ornamental Features

Prairie Petite Lilac features showy panicles of fragrant pink flowers rising above the foliage in mid spring. The flowers are excellent for cutting. It has bluish-green deciduous foliage. The heart-shaped leaves do not develop any appreciable fall color.

Landscape Attributes

Prairie Petite Lilac is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This is a high maintenance shrub that will require regular care and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Prairie Petite Lilac is recommended for the following landscape applications;

- Mass Planting
- General Garden Use

Planting & Growing

Prairie Petite Lilac will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to be a little leggy, with a typical clearance of 2 feet from the ground. It grows at a slow rate, and under ideal conditions can be expected to live for 50 years or more.

This shrub should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
