Royal Raindrops Flowering Crabapple

Malus 'JFS-KW5'

Height: 18 feet

Spread: 12 feet

Sunlight: ○

Hardiness Zone: 4

Other Names: Flowering Crab

Description:

Bright pinkish red flowers combine with deep purple cutleaf foliage to present a stunning crabapple; excellent upright form, branching and density; demonstrates great resistance to the common diseases such as apple scab and rust

Ornamental Features

Royal Raindrops Flowering Crabapple is covered in stunning clusters of fragrant rose flowers along the branches in mid spring before the leaves. It has attractive deep purple deciduous foliage. The deeply cut lobed leaves are highly ornamental and turn an outstanding scarlet in the fall. The fruits are showy red pomes carried in abundance from early to late fall.

Landscape Attributes

Royal Raindrops Flowering Crabapple is a deciduous tree with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This tree will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting birds to your yard. It has no significant negative characteristics.

Royal Raindrops Flowering Crabapple is recommended for the following landscape applications;

- Accent
- General Garden Use

Planting & Growing

Royal Raindrops Flowering Crabapple will grow to be about 18 feet tall at maturity, with a spread of 12 feet. It has a low canopy with a typical clearance of 3 feet from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 50 years or more.

This tree should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
