Height: 10 feet

Spread: 5 feet

Sunlight: ○ ◐

Hardiness Zone: 2

Other Names: Siberian Peashrub, Caragana

Description:

A true garden specimen shrub with almost ferny finely cut foliage and a highly pronounced weeping habit; usually grafted on a standard to a certain height; supremely hardy

Ornamental Features

Walker Weeping Caragana is primarily valued in the landscape or garden for its highly ornamental weeping form. It has yellow pea-like flowers hanging below the branches in mid spring. It has light green deciduous foliage. The deeply cut ferny pinnately compound leaves turn yellow in fall. The smooth olive green bark adds an interesting dimension to the landscape.

Landscape Attributes

Walker Weeping Caragana is an open multi-stemmed deciduous shrub with a rounded form and gracefully weeping branches. It lends an extremely fine and delicate texture to the landscape composition which can make it a great accent feature on this basis alone.

This is a relatively low maintenance shrub, and usually looks its best without pruning, although it will tolerate pruning. It has no significant negative characteristics.

Walker Weeping Caragana is recommended for the following landscape applications;

- Accent
- General Garden Use

Planting & Growing

Walker Weeping Caragana will grow to be about 10 feet tall at maturity, with a spread of 5 feet. It tends to be a little leggy, with a typical clearance of 1 foot from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It prefers to grow in average to dry locations, and dislikes excessive moisture. It is considered to be drought-tolerant, and thus makes an ideal choice for xeriscaping or the moisture-conserving landscape. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
